Thursday, August 31st

hanspj2 12:03 PM

Hey. I'm not going to be able to make it to today's session. Sorry.

benw 12:53 PM

^ I'm in the same boat. But I'll keep working on the ajax etc

osbots1 12:58 PM

Hi guys, I'm not going to be in today sorry, work commitments. I'll try and have the database schema ready for Tuesday.

mcquesd1 12:59 PM

benw 1:07 PM

Maybe we should reschedule the sprint for Tuesday?

mcquesd1 1:10 PM

if there is anything that cant wait chat about it here, if anyone has nothing to do check the trello to do list.

“ @osbots1 you might want to take a look at the SUV form for the DB side of things. It has some different form fields from the other forms. 😊

osbots1 2:31 PM

Awesome. Thanks

osbots1 4:47 PM

Where can I find a pdf copy of the SUV claim form? and shouldn't we have an UAV form, or is that what you meant?

mcquesd1 5:33 PM

Yeah same thing. It's in the zip file on slack that has the maintenance forms also.

Thursday, September 14th

mcquesd1 7:54 PM

replies from derek to todays questions.....11. If there are 2 policies will they always be through the same broker?

Yes

12. Do you want us to bring the SUV sample form in line with your other forms in terms of the required fields? - Yes please For example, the SUV has policy holder address and website fields that aren't on your other forms. No need for these additional fields.

13. We have a few more questions and would like to have a conference call to discuss. How are you placed on Tuesday at 10:30am? We will call your mobile.

At this stage I have no travel plans for Tuesday morning should be ok.

So he's good to go for the call on Tuesday..his mobile is 027 500 3010

albertwarner 8:04 PM

Excellent thanks Scott, tables have been created on the database, a few more to added by Phillip(if not already done) and then we will just need to make changes as we go alone. The tables don't have Foreign keys at the moment but we will sort that out. @osbots1 Adon is happy for us to use the table in front of his office and he might sit in the conference call.

mcquesd1 8:05 PM

nice, might be a good idea to have a list of questions ready to go.

Friday, September 15th

osbots1 12:29 PM

@albertwarner hmmm, tell Adon that it is normally good manners to wait until you are invited 😊

adonmoskal 1:44 PM

Adon actually has no interest in being on the conference call... I successfully palmed off the client onto y'all... he's all yours! 🙄

osbots1 2:07 PM

haha, gee thanks.

mcquesd1 8:26 PM

@albertwarner Hi Albert, there is another form we missed (another liability form for 3rd party damage). I have made the form and uploaded it to kate so you can work your php magic on it and add it to the others, cheers

Tuesday, September 19th

osbots1 8:28 AM

Hi guys, I don't think I'll be in today. I have three staff away and I think I'm coming down with a cold that I'm not interested in sharing. I'll be available on slack and I'll have a look at the foreign key constraints for the DB. (edited)

mcquesd1 8:46 AM

Do you guys have a list of questions for Derek this morning? Or would you guys like to reschedule? As mentioned I am away all week.

albertwarner 10:04 AM

Database: se17group1

Password: P@ssw0rd

Hi @mcquesd1, can we reschedule for next week please, thank you

mcquesd1 10:07 AM

Ok will let Derek know

Thursday, September 28th

mcquesd1 11:03 AM

<https://tristan denyer.com/demos/dynamic-form-bootstrap-3-0.html>

this might be useful???

mcquesd1 6:34 PM

Team...I have uploaded the Spray claim form to Git and Kate, it is the example of how the tags are used (for, id, name). The tag values are all on the database layout. @osbots1 can you please make sure the latest has been uploaded. I have allocated the following for tags duty: Scott...Aircraft and SUV. @osbots1 Helicopter. @bwendel Liability. @hanspj2 Hangarkeepers and Liability 3rd party. @albertwarner Equipment. I have also updated the client correspondence doc with Dereks latest reply on Git so if you ever need to check q + a from Derek its there. See you guys Tuesday @ 5pm. Have a great weekend.

albertwarner 6:36 PM

Excellent sounds thank you @mcquesd1, will get that sorted and see you guys on Tuesday @ 5pm

#ignore sounds lol

bwendel 6:39 PM

Thanks Scott. Have a great weekend too!

mcquesd1 6:40 PM

Forgot to mention, if there are any you are not sure of (I had a few), please make a note of them and we can cover them off on Tuesday.

Wednesday, October 4th

mcquesd1 8:20 AM

@hanspj2 @bwendel Can you guys please push your changed forms up to git. cheers 😊

bwendel 10:29 AM ☆

Done. 🙌

mcquesd1 2:08 PM

Reply from Derek: RE injuries...We only need to know the injuries for crew and passengers if injured. RE maintenance...drop down picker OK

Friday, October 6th

mcquesd1 12:38 PM

Is everyone keen to get together next Tuesday @ 5pm to discuss progress? I have added some clone code to the forms, they are up on Kate and Git if you want to take a look and provide some feedback / suggestions 🙌

bwendel 1:10 PM

Yes, next Tuesday is fine for me.

Monday, October 9th

mcquesd1 9:25 PM

What's up for tomorrow team? Keen to meet?

albertwarner 9:28 PM

Unfortunately I won't be able to make it sorry.

mcquesd1 9:29 PM

When is good for you Albert? We need you there to talk php

...

Tuesday, October 10th

mcquesd1 10:31 AM

OK, lets postpone till next Tuesday. As long as everyone has something to do this week???

bwendel 10:39 AM

I did the queries to insert the fields to the database for my form. However, I have to check with Tom because he was thinking to do in a different way. So I could do other forms during this week, but I don't want to do and then we change everything...

I am doing per section. For example, contact details, insurance details

So we can use with other forms

But Tom said there's a problem doing that way. Maybe I misunderstood, lol. That's why I want to check with him first before doing the others

mcquesd1 10:44 AM

Can you put what you have done on GIT. @osbots1 can you please have a look at this and let Bettina know if she can carry on 😊

bwendel 10:46 AM

Sure. I can't do at the moment, but later I can add to gitlab. I was going to ask him today during our meeting.

mcquesd1 10:48 AM

Its hard to know who's coming!! no problem if we don't meet, as long as we are keeping in touch here, and moving forward.

bwendel 10:54 AM

Yep, that's why I asked if we were still going to meet today, only three of us... 😊

Thanks Scott. I haven't looked at what you did yet. I will look at it today ok? Sorry, just had a crazy week.

I'll leave a message here when my code is available on gitlab.

bwendel 11:08 AM

Scott, are you working on the forms today?

Do you recall I said I have the code to fix the navbar? I was thinking to add today to the pages...

I just want to make sure the pages are updated

mcquesd1 11:09 AM

yes, i have fixed the navbar collapse, and fixed the active menu select also

Tuesday, October 10th

mcquesd1 11:12 AM

im adding the select for maintenance type now, i will push it all once ive done that.

bwendel 11:12 AM

Ok. Thanks. 😊

mcquesd1 11:14 AM

@albertwarner Only 3 assignments? nothing for a machine like you Albert. I hope you haven't been swearing too much. 🙄

bwendel 11:15 AM

Lol, Albert swearing?!! 😊

albertwarner 11:18 AM

Lack of sleep in past 5 days, you eventually start swearing at the computer 😊 we do how ever need to have a scrum when we return and this needs to noted in trello kanban

bwendel 1:12 PM

Hey, I just added the code for liability form to gitlab. I just called it liability-database for now. It will be added to the controller Albert is working on...

Tom, could you please take a look if it's correct or not? I know I repeated some code, but I will create functions for them later, so we can use in the other forms.

There are two fields that I didn't add because I couldn't find on maims.pdf. Circumstances and InsurerRef. I think I don't have the latest version of this file.

mcquesd1 1:16 PM

@osbots1 can you please upload the latest DB layout... 😊

bwendel 1:16 PM

I just fixed now before pushing it to gitlab the part that was about third parties, as Scott changed according to what we talked the last meeting.

And I checked you forms Scott. Well done. The part to add new people and insurance is really nice

I'm not sure, but I think for a new insurance, you have to add all fields again, not only the policy number. The policy period might be different etc...

mcquesd1 1:21 PM

derek said only another insurer ref and policy number

 **mcquesd1** 2:01 PM
@bwendel forms are up now GIT and KATE if you want to test at your end 🙌

🔍 | 🗨️ | 📌 | 🏷️ Add a topic

Tuesday, October 17th

Scott 2:19 PM ☆

Thanks Tom. We really all need to get together and finalise our php handling so everyone knows how to move forward. Hopefully everyone can be there on Thursday so we can get this done.

albertwarner 2:32 PM

Betina, phillip and i had a quick scrum. Betina is doing the example method, using my controller to add contact information to the database. Philip will be checking which file will use the same methods and put it into a document. I'm going to get the index drop down list connect to the different web pages (edited)

Scott 2:34 PM

Awesome. What do you want me to do?

🔍 | 🗨️ | 📌 | 🏷️ Add a topic

Thursday, October 19th

Scott 7:43 PM

Guys, I am looking at this HTML validation on the forms. As well as the multiple duplicate IDs being an issue and the validation has picked up 1 million other things!!! I will change all the IDs across the forms where necessary, adding section specific names to the IDs, and fix any other issues highlighted. @hanspj2 can you please post the form issues you found today. cheers 🙌

Scott 4:21 PM

I am happy to do the forms, and leave the php to you back end geniuses

albertwarner 4:22 PM

Has everyone got work to do?

osbots1 4:22 PM

By the way, if you load the form in the browser and then view the source (F12, or whatever, depending on browser) you will probably see that the browser has modified the markup so that it can render it. This may mean that it has added closing tags, etc. You could try copying this code and validating it / pasting it as the new code. You will have to be careful that it is not off the mark, but if it is rendering properly in the browser then it should be pretty close.

albertwarner 4:23 PM

You doing the validation errors aren't you @Scott ?

Scott 4:23 PM

yes i will validate the lot

osbots1 4:23 PM

added this HTML snippet: [helicopter claim form.html](#) ▾

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <title>Helicopter Claim Form</title>
```

osbots1 4:24 PM

That's my version of the helicopter claim form. I'm still at work, so I don't have time to validate it now, but it should be full of IDs 🙌

albertwarner 4:24 PM

Are you going to do them all or must we check the pages that were assigned to each memeber?

osbots1 4:25 PM

I think we should validate our own. In saying that, we need consistency across the forms . . . thoughts?

albertwarner 4:25 PM

Id for you and here is a id for you 🙌 ids all over the place

Scott 4:25 PM

i can do them all, you guys concentrate on the php

osbots1 4:26 PM

@albertwarner hahaha

Scott 4:26 PM

will be done over the weekend

osbots1 4:26 PM

Don't feel like you have to, we can all help. Then we can teach you some php 🙌

Scott 4:28 PM

its fine with me and it will , should guarantee consistency

Saturday, October 21st

Scott 5:02 PM

Let me know what forms u have done so I can work on the others.

I haven't

Sunday, October 22nd

albertwarner 8:05 PM

Nope I haven't touched the liability. [@Scott](#) stupid question are you doing the validation of the forms or are we suppose to do the pages assigned to us?

Monday, October 23rd

Scott 8:32 AM

i can do them, i thought you guys were going to get the php going?

albertwarner 10:51 AM

Cool no problem👍

osbots1 12:44 PM

Hi Scott, I'm just reviewing the Heli form . . . I think I may have pulled the wrong version at some stage

Scott 12:46 PM

The latest one will have all the scripts at the bottom of the body but I think it's still missing ids

osbots1 1:14 PM

Yeah, just working on that. I'm down to 26 validation errors from 260ish
I also just realised that I'm going to fail this paper, because the essay (which I thought was the big thing) is only worth 20%. But I'll keep chugging away and try to get the project across the line. I guess I should have come on the first day 😊

Scott 1:18 PM

just get one form validated, then get the php working on it. I can validate all the others

Scott 1:32 PM

FYI starting on the aircraft form now

Scott 2:16 PM

ok aircraft is done apart from warnings on use of date type. moving onto equipment form

Monday, October 23rd

bwendel 3:11 PM

I'm doing the liability form, so no need to validate this one Scott. 😊

osbots1 3:11 PM

And I've done almost all of the heli form

Scott 3:12 PM

Thanks guys a plus for communication. What a team. 😊

Monday, October 23rd

osbots1 4:22 PM ☆

We finally have a person in the database, now I'm going to uncomment the various parts of the aircraft form and work out which bit is breaking the post!

Scott 4:23 PM

nice work osbots

bwendel 4:26 PM

Hehe. I got it working now too

Scott 4:26 PM

nice work Bettina

bwendel 4:26 PM

The problem is the id

Scott 4:28 PM

equipment form on git now: validated

bwendel 4:28 PM

How are we going to do with the same ID's?

Scott 4:29 PM

can that be handled on a form by form basis? db only looks at the name?

bwendel 4:30 PM

But you have same ID's in one form. For example, first name is repeated 5 times

Scott 4:31 PM

yeah so ive just been adding section specific prefixes like...engFirstName for the engineer section, tpFirstName for third party etc

bwendel 4:32 PM

And how are you doing with the one you add passengers?

Scott 4:32 PM

cpFirstName (crew/passenger)

bwendel 4:33 PM

But everytime you add one...are you going to add a number?

Scott 4:33 PM

the script adds a number to the end for each additional entry

Scott 4:35 PM

aircraft and equipment i have put up, but does it need to be the same? the db only looks at the name attribute doesnt it?
i have only changed the for and id tags

bwendel 4:36 PM

I thought the name had to be unique too...

Scott 4:37 PM

i think that would cause an issue

osbots1 4:37 PM

The name has to be unique too, that was why I was getting empty people. I am updating the aircraft claim form now . . .

Scott 4:37 PM

oh ok.

i thought the name matched with the db field

bwendel 4:38 PM

Ok. I'll use the same ones

osbots1 4:38 PM

for convenience

The names for each passenger will have to be unique, then we will have to handle that in the controller

pFirstName1, pFirstName2 . . . etc.

Alternatively we could save them as an array of people objects and then post that . . . we'll get to that later

Scott 4:40 PM

so should i add the prefix to all my name attributes as well then?

W E B P R G R E E S P E

from the equipment table

Tuesday, October 24th

Scott 8:22 PM

suv form is validated and on GIT, but still missing a couple of attributes: not sure on "additional information" fields.

will do Spray form now

Scott 8:54 PM

spray form is done, on GIT @osbots1 is the heli form done? my version from the dev branch still needs validating. you said you were working on it a couple of days ago?

has it been pushed?
